## MEMORANDUM

DATE: April 17, 2025  
TO: Renewable Energy Tax Abatement (RETA) Project Managers  
THROUGH: Dwayne McClinton, Director *DM*  
FROM: Rachele Bokhove-Doubinkine, Energy Program Manager *RBD*  
SUBJECT: Annual Reporting of Actual Renewable Energy Production

---

The Nevada Governor's Office of Energy (GOE) has issued a new requirement for all RETA project sites and facilities. Effective immediately, all RETA Project Managers are required to submit an annual report of actual renewable energy production generated in their respective project locations.

This report must reflect the total renewable energy generated during the preceding calendar year (January 1<sup>st</sup> – December 31<sup>st</sup>).

### Reporting Requirements:

- Project Name
- Total Name plate capacity in MW
- Total production in MWh for calendar year (*if the site is still under contraction and not yet operational, please clearly indicate this in your submission*)

Reports must be submitted to [info@energy.nv.gov](mailto:info@energy.nv.gov) by **January 15<sup>th</sup>** of each year, beginning January 15, 2026, for the 2025 calendar year. This new reporting requirement supports GOE's efforts to monitor renewable energy production statewide and assess the ongoing impact of RETA-supported projects.

Please ensure your report is accurate and submitted on time. If you have any questions or require assistance, contact [info@energy.nv.gov](mailto:info@energy.nv.gov) or (775) 687-7189.

Thank you for your attention to this new requirement and for your continued support of Nevada's energy goals.
